

Type 100: Balanced Weave Round Wire belt (WG)

Features of the balance weave belts :

- Straight running of the woven belt
- Smooth surface of the wire belt, which enables transportation of goods with small contact surface
- Little open area enables transportation of small products
- Long lifetime of these woven belts
- It is not suitable for transportation of products, which leave residues on the belt, these will blind the belt and worsen its function.

Application of the woven belt / weave belt :

As a cooling belt in confectionery and chocolate industry, as a woven conveyor belt in chemical industry, as a wire cooling belt for rubber and plastic products, glass products and hot cast pieces, heat treatment belt , pasteurizing belt , etc.

Technical data balanced weave belt :

Pitch of cross wires	4,4 • 50,8 mm
Pitch of mesh	2,7 • 30,0 mm
Diameter of cross wire	0,80 • 5,00 mm
Dimensions of spiral wires	1,2 x 0,6 • 4,0 x 2,0 mm
Standard materials	bright steel • stainless steel • heat resistant wires.
Operating temperature	up to 1150°C
Termination of edges	with loop (S) • clinch (U) • weld (G)
Belt width	30 mm to 6000 mm
