

Type 200: Balanced Weave Flat Wire Belt (WG)

Features of the balanced woven flat wire metal belt :

- Straight running of the flat wire conveyor belt
- Smooth surface of the woven belt, which enables transportation of goods with small contact surface
- Large open area enables washing or drying of products on the wire metal belt
- Long lifetime of these metal belts
- Quite low price of these conveyor belts
- It is not suitable for transportation of products, which leave residues on the woven wire belt

Application of the woven wire belt / spiral belt :

As a cooling conveyor flat spiral belt in glass works and ceramic plants, as a metal conveyor belt in confectionary and chocolate industry, as a wire conveyor belt in chemical industry, as a washing ovenbelt in industry of drinks and canning industry, as a drying ovenbelt in wood-processing industry, heat treatment belt, pasteurizing belt etc.

Technical data of the woven belt / flat spiral belt :

Pitch of cross wires	4,4 • 50,80 mm
Pitch of mesh	2,7 • 30,0 mm
Diameter of cross wires	1,20 • 8,00 mm
Dimensions of spiral wires	1,40 x 0,70 • 4,00 x 2,00 mm
Standard materials	bright steel • stainless steel • stainless steel for high temp.
Operating temperature	below 750°C
Termination of edges	with weld (G) • loop (S)
Belt width	30 mm to 6000 mm
